Work Experience

BLACKTWENTY Sports Apparel | *Full-Stack Developer* | **Family Business**

- **End-to-End Development:** Architected and deployed a custom internal workflow management system from scratch using PHP (Codeigniter 4) and MySQL.
- **Data Visualization:** Integrated Chart.js and ECharts to provide real-time visual analytics for project tracking and employee productivity.
- **DevOps:** Managed full server lifecycle on GoDaddy, ensuring 99.9% uptime and performing regular database optimizations.
- **Leadership:** Acted as Lead Developer and Project Manager, translating business requirements into technical specifications.

Freelance Web Developer | *Various Clients*

- **Custom Integration:** Implemented custom plugins and themes to extend core WordPress functionality based on specific client business requirements.
- **Performance Optimization:** Improved site loading speeds and SEO rankings for client sites by optimizing CSS, images, and database queries.

uBind | *Product Developer* | **Feb 2022 – Nov 2024**

- **FinTech Integration:** Configured complex payment processing integrations with credit card and premium funding providers.
- **Data Architecture:** Developed integration endpoints to facilitate seamless data transfer between disparate systems.
- **System Logic:** Built specialized insurance rating calculations and automated the generation of legal documents (Policy Schedules, Certificates of Currency).
- **Template Engineering:** Utilized Shopify Liquid to create and design complex insurance documents, including Quote Schedules, Policy Schedules, and Certificates of Currency.
- **UX Excellence:** Implemented best-practice UX principles for form design to optimize user conversion and data accuracy.

Callmax Solutions | *MIS - Lead Programmer* | **Jan 2020 – Feb 2022**

- **Team Leadership:** Served as the Programming Lead, overseeing the development of centralized enterprise software.
- **Enterprise Solutions:** Developed a comprehensive monitoring suite used by Agents, QAs, and Executive leadership to track attendance, billable hours, and performance markdowns.
- **Full-Stack Stack:** Leveraged PHP, JavaScript, and Ajax to create a high-concurrency database environment.

Education

College

- **Bachelor of Science in Information Technology** - Cavite State University - Main Campus 2015 – 2019
